P's Guard is clean material fitting with Halal policy.

P's Guard is 100% qualified with the "Halal products' rules and conditions". And our raw materials does not contain any ALCOHOL at all, and 100% genuine SODIUM HIPOCHLORITE itself.

During the time of corona pandemic era, most popular disinfectant was Alcohol Liquid which has been used all over the places and occasions, but ALCOHOL is not seemed to be fit with Halal Policy and Rule.

And Alcohol has not be used for sterilizing the air of room where human beings live and stay, and only P's Guard has been used for the purpose of air sterilizing purposes. You can easily understand that splayed Alcohol is very dangerous and harmful, in spite of the fact that virus infection is made mostly by Air Sprayed and Floating Viruses.

Now, we have been in the safer positions against corona and other various viruses, and our guarding conditions have been law and light. However, without masks and guarding panels etc.

We must protect ourselves by cleaning living space air conditions which is recommended to use P's Guard to be sprayed constantly. This spraying manner is protecting "infection" from the virus holders to others in the same room.

We will recommend you to prepare for the possible "Infection".

P's Guard will be helpful for all of you.
